## **DETAILED ACTION**

### ***Election/Restrictions***

The restriction requirement below is necessitated by Applicant's amendments filed 05/14/2007. Restriction is required under 35 U.S.C. 121 because claims 36 and 60 are drawn the following distinct inventions.

Claims 36 and 60 are subject to an additional restriction since they are not considered to be a proper genus/Markush. See MPEP 803.02 – PRACTICE RE MARKUSH-TYPE CLAIMS – if the members of the Markush group are sufficiently few in number or so closely related that a search and examination of the entire claim can be made without serious burden, the examiner must examine all the members of the Markush group in the claims on the merits, even though they are directed to independent and distinct inventions. In such a case, the examiner will not follow the procedure described below and will not require restriction. Since the decisions in *In re Weber*, 580 F.2d 455, 198 USPQ 300 (CCPA 1980); and *In re Haas*, 580 F.2d 461, 198 USPQ 334 (CCPA 1978), it is improper for the Office to refuse to examine that which applicants regard as their invention, unless the subject matter in a claim lacks unity of invention. *In re Harnish*, 631 F.2d 716, 206 USPQ 300 (CCPA 1980); and *Ex parte Hozumi*, 3 USPQ2d 1059 (Bd. Pat. App. & Int. 1984). Broadly, unity of invention exists

Art Unit: 1635

where compounds included within a Markush group (1) share a common utility, and (2) share a substantial structure feature disclosed as being essential to that utility.

Claims 36 and 60 specifically claim target gene sequences comprising a region from the sonic hedgehog sequence amplified by SEQ ID NOs. 12, 13, 14 and 15, a B-catenin sequence encoding its amino acid domain from positions 306 to 644 and a bcl-2 sequence amplified by SEQ ID Nos. 8 and 9. Each sequence is considered to be unrelated, since each sequence claimed is structurally and functionally independent and distinct for the following reasons: each of the claimed sequences are unique and therefore would require a different hybrid duplex that would bind to each unique sequence independently. Moreover, each of the claimed sequences do not share a substantial structural feature or a common utility such that a search for a hybrid duplex that binds a target gene comprising SEQ ID No. 12 would yield a hybrid duplex that binds to a target gene comprising a bcl-2 sequence amplified by SEQ ID NO. 8, for example. Furthermore, a search of more than one (1) of the claimed sequences claimed in claims 36 or 55 presents an undue burden on the Patent and Trademark Office due to the complex nature of the search and corresponding examination of more than one (1) of the claimed sequences. In view of the foregoing, one (1) sequence is considered to be a reasonable number of sequences for examination. Accordingly, applicants are required to elect a total of one (1) target gene sequence from claims 36 and 60. Note that this is not a species election.

Art Unit: 1635

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Claim 32 link(s) inventions of claims 36 and 60. The restriction requirement between the linked inventions is subject to the nonallowance of the linking claim(s), claim 32. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01
